Lippincott's
Workbook
for **Nursing**
Assistants **A Humanistic**
Approach
to Caregiving

Pamela J. Carter, RN, BSN, MEd, CNOR

This full-color, user-friendly workbook is organized in the same straightforward way as *Lippincott's Textbook for Nursing Assistants*. Exercises for each chapter in the text, and for Appendix C, "Introduction to the Language of Health Care," are provided, along with procedure checklists for every procedure in the text. Workbook chapter organization matches that of the text, and exercises are grouped according to key learning points (derived from the learning objectives in the text). This section approach makes it easy to complete assignments on all or part of a chapter, and to easily identify areas where more review is needed. "Pam's Pearls," words of advice and encouragement from the author to the student, are scattered throughout.

Each of the 43 chapters—plus Appendix C, "Introduction to the Language of Health Care"—features an assortment of exercises designed to appeal to a variety of learning styles:

Multiple choice: select the best answer from four choices

Fill-in-the-blanks: complete a phrase or a sentence

Think About It! write a short response to a thought-provoking "What if?" scenario

True-false: identify the true statements and correct the false ones

Crossword puzzles: decipher the clues to complete the puzzles

Identification exercises: recognize the phrases or sentences that apply to each situation

Sequencing exercises: list the correct order of steps in a procedure or arrange the parts of a particular figure

Matching: match the terms (or pictures) to their descriptions

Art labeling: fill in the missing labels from a key piece of artwork

Word find puzzles: locate key vocabulary words in the grid of letters

Word scramble puzzles: use the clues to rearrange scrambled letters and reveal key vocabulary words

"What Is Wrong With This Picture?" exercises: look at a drawing and list the things that are wrong with it
