# Advanced Skills for Nursing Assistants

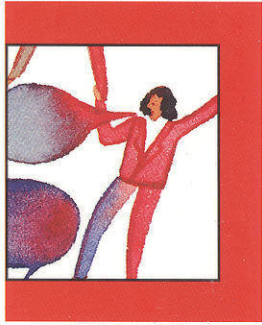

Francie Wolgin

Today's health care environment requires nursing assistants to be highly versatile, flexible, multi-skilled caregivers. ***Advanced Skills for Nursing Assistants*** specifically addresses this need by facilitating the acquisition and development of additional patient care skills that can be performed in a variety of health care facilities.

## Key Features:

- Addresses over four dozen advanced skills and procedures including urinary catheterization, staple and suture removal, tracheostomy care, enteral nutrition administration and neurological function observation.
- Detailed step-by-step instructions walk learners through each skill with a description of its purpose, objectives, key terms and necessary supplies and equipment.
- Emphasizes age-specific considerations throughout.
- Promotes personal and professional growth and job satisfaction.
